DETAILED ACTION

Information Disclosure Statement

The IDS filed 1/7/04 has been considered and placed of record. An initialed copy is attached herewith.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bertness (Us 6,316,914) in view of Applicant's own admitted art on page 11. The references do not explicitly disclose an integral torch/light to illuminate the area of testing. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have integrated the light onto the testing probe, since it has been held that the constituent parts are so combined as to constitute a unitary whole. Webster's New International Dictionary (2nd Edition) defines "integral" as "(2) composed of constituent parts making a whole; composite; integrated." Therefore the use of a one piece construction instead of the two or more pieces would be merely a matter of obvious engineering choice. *In re Larson*, 144 USPQ 347 (CCPA 1952); *In re Fridolph*, 50 CCPA 745, 89 F.2d 509, 135 USPQ 319.
